

Electronic Newsletter

Volume 1 Issue 3

This newsletter is produced to keep you informed on the technical innovations in pork production. Lowering cost of production, improving productivity and ensuring an industry that is sustainable is the foundation of Prairie Swine Centre's research and technology transfer approach.

Every two weeks we introduce or reintroduce topics that can make a difference in how you manage your business. These technical insights come from research at Prairie Swine Centre, as well as other institutions, which we have identified can make a difference to the business of producing pork in Canada.

This week we focus on the handling and transportation of pigs to market. The links will take you to two presentations delivered in a series of industry presentations we conducted in western Canada last week; the third link is an article in our Annual Report on transportation research.

To view the topics for this weeks newsletter click on the links below or visit www.prairieswine.ca

To the pork producers of Manitoba, Saskatchewan and Alberta - Thank you for your continued support of Prairie Swine Centre research and technology transfer programs.
