

## Electronic Newsletter

Volume 1 Issue 9

This week there are two focuses of the newsletter. First off Volume 15 Issue 2 of Centred on Swine is out in circulation and available in full PDF format on our website. This edition features current research at the Centre such as “Nutritional Value of Flaxseed for Swine and Its Effects on Carcass Fatty Acid”, and “Free Space Utilization of Sows in Free Access Stalls”. The ventilation article “Comparative Evaluation of Infrared Radiant and Forced-Air Convection Heating Systems for Hog Barns” is focused on heating system changes which you may be making this summer in preparation for next fall. The link provided below will take you to the latest edition of Centred on Swine.

The second item this week is a short website survey. The Prairie Swine Centre is undergoing a major website renovation to better serve you, the user. This short survey will help us understand how we are doing and where we need to improve. The questionnaire is short and will only take 3 minutes to complete.

Go to our Home Page [www.prairieswine.ca](http://www.prairieswine.ca) and click on the bright pink link in top right corner NEW WEBSITE SURVEY.

Your input as website users is invaluable to this process and we encourage and thank you for your feedback and continued support.

Regards,
